NAVARTI
cerámica

welcome

bienvenidos a navarti

ES

Desde 2014 y con más de 20 años de experiencia en el sector, Navarti Cerámica trabaja día a día en construir unos fuertes valores basados en el diseño, la innovación y la calidad de nuestro producto. Todo esto unido a una atención al cliente de calidad junto con una fuerte presencia en el mercado tanto a nivel nacional como internacional.

Gracias al avance de nuestras tecnologías y a un equipo proactivo e inconformista, Navarti es sinónimo de evolución y buen gusto. El compromiso medioambiental nos define, ya que utilizamos procesos de fabricación que simplifican de manera significativa la huella de carbono en el planeta Tierra. Y como muestra de ello, poseemos diversos certificados, en los cuales se reconocen estrategias y prácticas de construcción sostenible, saludables y altamente eficientes.

En este catálogo, a través de la amplia variedad de colecciones que presentamos, buscamos satisfacer todo tipo de gustos y necesidades. Todo ello gracias al multiformato, a los distintos acabados y reproducciones altamente fieles a los materiales reales.

Pero sobretodo, queremos servir de inspiración y poder acompañar a las personas en su proyecto de vida.

EN

Since 2014 and with more than 20 years of experience in the sector, Navarti Cerámica works every day to build strong values based on the design, innovation and quality of our product. All this coupled with quality customer service together with a strong presence in the market both nationally and internationally.

Thanks to the advancement of our technologies and a proactive and non-conformist team, Navarti is synonymous with evolution and good taste. Our environmental commitment defines us, as we use manufacturing processes that significantly simplify the carbon footprint on planet Earth. And as proof of this, we have various certificates, in which sustainable, healthy and highly efficient construction strategies and practices are recognized.

In this catalog, through the wide variety of collections that we present, we seek to satisfy all kinds of tastes and needs. All this thanks to the multi-format, the different finishes and reproductions highly faithful to real materials.

But above all, we want to serve as inspiration and be able to accompany people in their life project.

compromiso medioambiental

ES

Navarti Cerámica cuenta con un sistema de gestión ambiental para **identificar y minimizar el impacto** de sus operaciones sobre las emisiones atmosféricas, aguas residuales, residuos y contaminación acústica.

La compañía está comprometida con el cumplimiento de las disposiciones legales en material medioambiental. Navarti cuenta con la **Autorización Ambiental Integrada**, otorgada por la Conselleria de Territorio y Vivienda de la Generalitat Valenciana. A parte, aplicando criterios de mejora continua, lleva a cabo una valorización interna de los residuos y una recogida selectiva de los mismos como cartón, plástico o madera.

Otro imput que Navarti tiene en cuenta, es el compromiso con la mejora en la gestión del agua, basada en los principios de reutilización y optimización de la misma en diferentes procesos. Además, apuesta por la aplicación constante de criterios de eficiencia energética en sus instalaciones y actividades. La compañía cuenta con **Declaraciones Ambientales de Producto** (DAP) para todas las familias de producto que comercializa. Una declaración concedida por Aenor en 2014 y ampliada en 2015 que destaca productos respetuosos con el medio ambiente.

EN

Navarti Cerámica has an environmental management system to identify and minimize the impact of its operations on atmospheric emissions, wastewater, waste and noise pollution.

The company is committed to complying with legal provisions on environmental matters. Navarti has the Integrated Environmental Authorization, granted by the Department of Territory and Housing of the Generalitat Valenciana. In addition, applying criteria of continuous improvement, it carries out an internal recovery of waste and a selective collection of the same as cardboard, plastic or wood.

Another imput that Navarti takes into account is the commitment to improving water management, based on the principles of reuse and optimization of it in different processes. In addition, it is committed to the constant application of energy efficiency criteria in its facilities and activities. The company has Environmental Product Declarations (DAP) for all the product families it markets. A statement granted by Aenor in 2014 and extended in 2015 that highlights environmentally friendly products.

antibacteriano

antibacterial / antibactérien / antibakteriell

La gran mayoría de bacterias son inocuas para la salud, no obstante, existen algunas dañinas que se pueden propagar en las superficies generando desde malos olores hasta posibles dolencias. Por esta razón, resulta imprescindible llevar a cabo procesos de limpieza exhaustivos, sobretodo en zonas comunes de uso corriente. En respuesta a esta necesidad, se ha desarrollado la serie Method, que, gracias al uso de iones de plata integrados en la masa cerámica, mejora la higiene en la superficie de la misma. En este sentido, también ofrece un valor añadido de protección para los usos más intensos.

Beneficios)

/ Impedimento del desarrollo de microorganismos, por lo que nos protege contra todo tipo de bacterias.

/ La eficiencia antimicrobiana se ha determinado según la norma JIS 2801 y el ensayo para la protección antivírica ISO 21702.

/ Zonas limpias durante más tiempo, y más fáciles de higienizar debido a sus propiedades antibacterianas.

/ Material recomendado para todo tipo de usos y zonas.

The vast majority of bacteria are harmless to health, however, there are some harmful ones that can spread on surfaces generating from bad odors to possible diseases. For this reason, it is essential to carry out exhaustive cleaning processes, especially in areas of common use. In response to this need, we have developed the Method collection, which, thanks to the use of silver ions integrated in the ceramic body, improves hygiene on the tile surface. In this sense, it also offers an extra protection for the most intense uses.

Benefits)

/ Impediment of the development of microorganisms, so it protects us against all types of bacteria.

/ The antimicrobial efficiency has been determined according to the JIS 2801 standard and the ISO 21702 antiviral protection test.

/ Clean areas for longer, and easier to sanitize due to its antibacterial properties.

/ Recommended material for all types of uses and areas.

La grande majorité des bactéries sont inoffensives pour la santé, cependant, certaines sont nocives qui peuvent se propager sur les surfaces, générant de mauvaises odeurs au possible maux. Pour cette raison, il est essentiel d'effectuer des processus de nettoyage exhaustifs, en particulier dans les zones communes d'usage courant. En réponse à ce besoin, a développé la série Method qui, grâce à l'utilisation d'ions argent intégrés dans la masse céramique, améliore l'hygiène de la surface céramique. En ce sens, aussi offre une valeur de protection supplémentaire pour les utilisations les plus intenses.

Avantages)

/ Empêchement du développement des microorganismes, il nous protège donc contre tous les types de bactéries.

/ L'efficacité antimicrobienne a été déterminée selon la norme JIS 2801 et le test de protection antivirale ISO 21702.

/ Nettoyer les zones plus longtemps et plus facilement désinfecter grâce à ses propriétés antibactériennes.

/ Matériel recommandé pour tous types d'utilisations et zones.

Die überwiegende Mehrheit der Bakterien ist gesundheitlich unbedenklich, jedoch gibt es einige schädliche Bakterien, die sich auf Oberflächen ausbreiten können und von schlechten Gerüchen bis hin zu möglichen Krankheiten führen. Aus diesem Grund ist eine gründliche Reinigung, insbesondere in den Gemeinschaftsbereichen des täglichen Gebrauchs, unerlässlich. Als Antwort auf dieses Bedürfnis wurde die Method-Serie entwickelt, die durch den Einsatz von Silberionen, die in die Keramikmasse integriert sind, die Hygiene der Keramikoberfläche verbessert. In dieser Hinsicht ist es auch Mehrwert in Bezug auf den Schutz für die intensivste Nutzung.

Leistungen)

/ Beeinträchtigung der Entwicklung von Mikroorganismen, dadurch Schutz vor allen Arten von Bakterien.

/ Die antimikrobielle Wirksamkeit wurde gemäß der Norm JIS 2801 und dem Test für antiviralen Schutz nach ISO 21702 bestimmt.

/ Flächen bleiben länger sauber und lassen sich aufgrund der antibakteriellen Eigenschaften leichter desinfizieren.

/ Material empfohlen für alle Arten von Anwendungen und Bereichen.

Zoey 120x120 / 48"x48"

xtra

6 mm

DE

Unser feinstes Porzellan
mit einer Stärke von 6mm.

FR

Notre porcelaine la plus
fine d'une épaisseur de 6
mm.

EN

Our finest porcelain with a
thickness of 6mm.

ES

Nuestros porcelánicos
más finos con un espesor
de 6mm.

cedar • tabil • arty • convec

Presentamos nuestra nueva familia de porcelánico **XTRA /** extra **slim**, extra **resistente**, extra **flexible** y, sobre todo, extra **sostenible**.

¿Por qué extra slim? Su espesor oscila entre los 6 mm. Esto la hace menos pesada y mejora su manejabilidad. Además, su espesor permite que se pueda aplicar en más campos a la hora de decorar y revestir proyectos.

¿Por qué extra flexible? Es una pieza más fina y, por tanto, más elástica. Esto, junto a su poco peso, facilita la instalación. Convexidad y planitud.

¿Por qué extra resistente? Destacamos su resistencia a la carga de rotura. Estas piezas están diseñadas y producidas con unas prensas especiales y tierras de vidrio evitando considerablemente roturas en las piezas.

¿Por qué extra sostenible? Al tener un espesor tan fino podemos transportar más metros cuadrados en un mismo pallet. Esto abarata la logística y transporte, colaborando directamente con el respeto al medio ambiente mientras reducimos las emisiones de CO2 y residuos. Además, utilizamos menos materia prima y, por tanto, se necesita menos energía para producir estas piezas. Con esta nueva tipología de producto ahorraremos una gran cantidad de plástico, madera y CO2.

¿Por qué extra versátil? Su reducido espesor permite mucha más versatilidad que cualquier otra pieza de espesor tradicional, tanto en la fabricación como en el transporte. El reducido peso facilita que las cajas puedan contener más piezas y por lo tanto más m2/cj.

¿Por qué extra ligero? Su volumen es inferior a cualquier otra pieza, por lo que su peso se reduce considerablemente. Ello facilita muchos aspectos, como es el caso de la colocación en formatos más grandes.

Likewise, we present our new family of **XTRA** porcelain tiles: extra **slim**, extra **resistant**, extra **flexible** and, above all, extra **sustainable**.

Why extra slim? Its thickness varies between 6 mm. This makes it less heavy and improves its handling. In addition, its thickness allows it to be applied in more camps when it comes to decorating and coating projects.

Why extra flexible? It is a thinner piece and, therefore, more elastic. This, together with its low weight, facilitates installation. Convexity and flatness.

Why extra resistant? We highlight its resistance to breaking load. These pieces are designed and produced with special presses and glass grounds, considerably avoiding breakages in the pieces.

Why extra ecologic? By having such a thin thickness, we can transport more square meters on the same pallet. This makes logistics and transport cheaper, collaborating directly with respect for the environment while reducing CO2 emissions and waste. In addition, we use less raw material and therefore less energy is needed to produce these parts. With this new type of product we will save a large amount of plastic, wood and CO2.

Why extra versatile? Its reduced thickness allows much more versatility than any other piece of traditional thickness, both in manufacturing and in transport. The reduced weight makes it easier for the boxes to contain more pieces and therefore more m2/cj.

Why extra light? Its volume is less than any other piece, so its weight is considerably reduced. This facilitates many aspects, such as placement in larger formats.

Technical Solutions

La adherencia entre la pieza y el soporte junto con una buena colocación juegan un papel imprescindible en la vida útil de la cerámica. El avance de las tecnologías ha dado lugar a una nueva era debido a la mejora en las propiedades de la cerámica, tales como la disminución de la porosidad, la alta resistencia a la abrasión y al hielo y la creación de grandes formatos y acabados de ensueño.

Dicha evolución cerámica da lugar al avance de los adhesivos, pasando de una adherencia mecánica, en el que se necesita una gruesa capa de material, frente a la adherencia química actual, la cual, a parte de reducir la cantidad de material a utilizar, mejora la adherencia y por consiguiente su durabilidad.

Algunas recomendaciones para garantizar la correcta colocación de la baldosa cerámica son utilizar herramientas y útiles adecuados, tales como llana dentada, maza de goma blanca, nivel de burbuja y ventosa. La instalación será siempre con doble encolado, junta mínima de 2 mm, excepto espesados, que dejaremos una junta mínima de 5 mm. No utilizaremos productos que contengan negro de humo o carbón micronizado. Como también, una buena limpieza del soporte para eliminar cualquier resto de yeso o pintura, utilizando siempre limpiadores finalizadores de obra, que no contengan ácido fluorhídrico. A parte de considerar siempre las indicaciones del fabricante.

The adhesion between the piece and the support together with a good placement play an essential role in the useful life of the ceramic. The advancement of technologies has given rise to a new era due to the improvement in the properties of ceramics, such as reduced porosity, high resistance to abrasion and ice and the creation of large formats and dream finishes. .

This ceramic evolution gives rise to the advancement of adhesives, moving from a mechanical adherence, in which a thick layer of material is needed, compared to current chemical adherence, which, apart from reducing the amount of material to be used, improves adherence and consequently its durability.

Some recommendations to guarantee the correct placement of the ceramic tile are to use suitable tools and tools, such as notched trowel, white rubber mallet, spirit level and suction cup. As well as a good cleaning of the support to remove any remaining plaster, painting etc. Apart from always considering the manufacturer's indications.

certificación
Certification

Nuestra constante inquietud por avanzar y satisfacer las necesidades más exigentes del mercado, nos permite tener un producto cerámico de calidad con un diseño de última tendencia. Este compromiso se ha visto reconocido por los distintos certificados de calidad. Alcanzamos con creces los requisitos que nos convierten en una empresa certificada ISO 9001:2015 en el diseño, producción y distribución de nuestras colecciones cerámicas. Disponemos de un sistema productivo basado en la calidad de nuestros productos y la confianza de nuestros clientes.

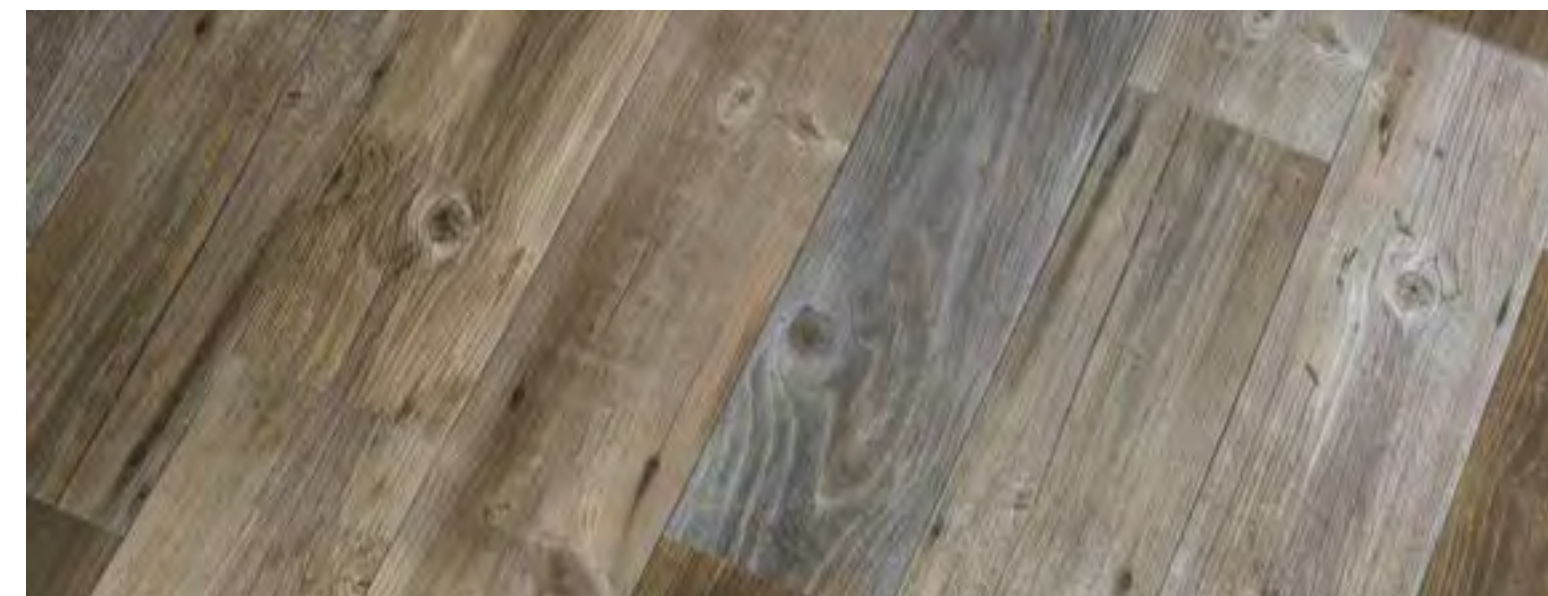

Our constant concern to advance and satisfy the most demanding needs of the market, allows us to have a quality ceramic product with a cutting-edge design. This commitment has been recognized by the various quality certificates. We more than reach the requirements that make us an ISO 9001: 2015 certified company in the design, production and distribution of our ceramic collections. We have a production system based on the quality of our products and the trust of our customers.

Descarga nuestros certificados aquí.

ISO 14021:2016

modelos upec

UPEC series

El sello UPEC es un certificado francés expedido por el Centre Scientifique du Bâtiment (CSTB), el cual garantiza la seguridad y calidad de los productos cerámicos de Navarti conforme a unas especificaciones técnicas concretas. Para la obtención de este sello, clasificado dentro del certificado NF, los materiales de Navarti han sido sometidos a unos rigurosos controles de calidad. Cada sigla de la palabra UPEC hace referencia a un rasgo específico del material:

- U** - resistencia al desgaste
- P** - resistencia a la perforación o rotura
- E** - resistencia a la humedad y al agua
- C** - resistencia a los agentes químicos

The UPEC seal is a French certificate issued by the Centre Scientifique du Bâtiment (CSTB), which guarantees the safety and quality of Navarti ceramic products according to specific technical specifications. To obtain this seal, classified within the NF certificate, Navarti materials have been subjected to rigorous quality controls. Each acronym of the word UPEC refers to a specific feature of the material:

- U - wear resistance
- P - resistance to puncture or breakage
- E - resistance to moisture and water
- C - resistance to chemical agents

CARACTERÍSTICAS TÉCNICAS REVESTIMIENTO MONOPOROSA / TECHNICAL FEATURES FOR MONOPOROSA WALL TILES

	GRUPO BIII (GL) Absorción de agua > 10% GROUP BIII (GL) Water absorption > 10%	NORMAS DE ENSAYO STANDARD	VALORES PRESCRITOS NORMA EN 14411 / VALUE REQUIRED BY EN 14411 STANDARD	VALOR MEDIO AVERAGE VALUE
	Características dimensionales Dimensional features	ISO 10545-2		Cumple la norma Conforms to standard
	Absorción de agua Water absorption	ISO 10545-3	> 10%	16%
	Resistencia a la flexión Modulus of rupture Fuerza de rotura Breaking strength	ISO 10545-4	> 15 N / mm2 > 600 N	15 - 25 N / mm2 400 N
	Resistencia a la abrasión superficial Resistance to surface abrasion	ISO 10545-7	Clase indicada por el fabricante Abrasion class indicated by the manufacturer /	No aplica Not apply
	Dilatación térmica lineal Linear thermal expansion	ISO 10545-8	Método de ensayo disponible Test method available	<7,0 x 10-6 °C-1
	Resistencia al choque térmico Thermal shock resistance	ISO 10545-9	Método de ensayo disponible Test method available	Resiste Resists
	Resistencia al cuarteo Crazing resistance / Résistance au tressailage	ISO 10545-11	Exigida Required Exigée	Resiste Resists Résiste
	Resistencia química Chemical resistance	ISO 10545-13	Método de ensayo disponible Test method available Mínimo GB Minimum GB	Cumple la norma Conforms to standard Clase GA Class GA
	Resistencia a las manchas Resistance to stains	ISO 10545-14	Mínimo clase 3 Minimum class 3	Cumple la norma Conforms to standard

	GRUPO BIIa (GL) 3% < Absorción de agua < 6% GROUP BIIa (GL) 3% < Water absorption < 6%	NORMAS DE ENSAYO STANDARD	VALORES PRESCRITOS NORMA EN 14411 / VALUE REQUIRED BY EN 14411 STANDARD	VALOR MEDIO AVERAGE VALUE
	Características dimensionales Dimensional features	ISO 10545-2		Cumple la norma Conforms to standard Satisfait à la norme
	Absorción de agua Water absorption	ISO 10545-3	3% < E < 6%	5%
	Resistencia a la flexión Modulus of rupture Fuerza de rotura Breaking strength	ISO 10545-4	> 22 N / mm² > 1000 N	30 - 40 N / mm2 1100 - 1900 N
	Resistencia a la abrasión superficial Resistance to surface abrasion	ISO 10545-7	Clase indicada por el fabricante Abrasion class indicated by the manufacturer	No aplica Not apply
	Dilatación térmica lineal Linear thermal expansion	ISO 10545-8	Método de ensayo disponible Test method available	<7,0 x 10-6 °C-1
	Resistencia al choque térmico Thermal shock resistance	ISO 10545-9	Método de ensayo disponible	Resiste Resists
	Resistencia al cuarteo Crazing resistance	ISO 10545-11	Exigida Required	Resiste Resists
	Resistencia química Chemical resistance	ISO 10545-13	Método de ensayo disponible Test method available Mínimo GB Minimum GB	Cumple la norma Conforms to standard / Clase GA Class GA
	Resistencia a las manchas Resistance to stains	ISO 10545-14	Mínimo clase 3 Minimum class 3	Cumple la norma Conforms to standard

CARACTERÍSTICAS TÉCNICAS PAVIMENTO PASTA ROJA / TECHNICAL FEATURES CERAMIC FLOOR TILES

CARACTERÍSTICAS TÉCNICAS GRES PORCELÁNICO ESMALTADO / TECHNICAL FEATURES GLAZED PORCELAIN TILES
