Declaration concerning GRUNDFOS' compliance with RoHS directive

GRUNDFOS Holding A/S and its subsidiaries, among those the HVAC OEM Division, accept their responsibilities and are committed not to use hazardous substances in their products.

Grundfos products are not as of today in general covered by the RoHS directive.

In regards to the RoHS directive (2002/95/EC) amended by directive (2011/65/EC) on the restriction of the use of certain hazardous substances in electrical and electronic equipment (EEE) latest in 2019 all EEE will as a starting point be affected.

However, Grundfos is now in complete voluntary RoHS-compliance concerning the non-use of the certain hazardous substance in GRUNDFOS products, among those the UP, UPS, UPR and UPM circulators.

To ensure that this continues we have implemented the following initiatives:

- All suppliers to Grundfos are under contractual obligation not to deliver products that hold RoHS- restricted substances.
- Grundfos continuously audits their suppliers to ensure full contractual compliance, including RoHS compliance.
- Grundfos does not accept hazardous substances in their products. It is a standard task in product development projects to ensure that hazardous substances are not used.

Yours sincerely
GRUNDFOS Holding A/S

Preben Jakobsen
Technical Director
HVAC OEM Division
