FJVR valves in a new design

As of September 1st the FJVR valves is undergoing a design change:

- 3/8" and 1/2" valves will be in identical design with nickel plated brass surface.
- The valve neck is extended by approx. 6 mm
- Valve insert is identical to RA-FN. Gland seal used is 013G0290.
- Valves are with "Eurocone" on both in- and outlet.

Existing code no's 003L1009, 003L1010, 003L1013 and 003L1014 are maintained.

Capacities remain the same or possibly slightly higher.

Content of multipack is changed to 60 pcs. for code no 003L1014.

Data sheets in PCM system will be updated.

Delivery

Production is from Sept. 1st.

Delivery of new version will take place as stock becomes exhausted.
