-  Yellow
-  Chrome
-  Nickel
-  White

Maximum differential pressure: Size 1/2" 0,8 bar - Size 3/4" 0,7 bar - Size 1" 0,6 bar
Temperature range: 2°C-120°C
Actuator attachment: M30x1,5
Stroke: 3mm
Available with actuators: art.350-351
Allowed fluids: water (Glycole max percentage: 50%)
The operation of the fan coil valve is done by the automatic movement of the plug which shut-offs the heat-transfer fluid. The 2-ways valve 662 is used for shutting off operations, while the 3 and 4-ways 663/664 are used for mixing and diverting the heat-transfer fluid to a heating or air conditioning system.
When the spindle
