

DILATION JOINT

Dilation joint with adhesive base made of expanded polyethylene. It is ideal to cut the concrete, for example, at the doorway, in order to guarantee the right dilation. Its upper part shall be leveled out once the screed is ready. 20-mm adhesive film on the backside. Size: h 100 mm, th. 8.5 mm, l 2000 mm.

Code

1054220

Feature	Value	Unit
Length	2000	mm
Height	100	mm
Thickness	7,5 ÷ 9,5	mm
End thickness	30	mm
Dimensional tollerances	± 10	%
Cell structure	Closed cells	
Specific weight	50	kg/m ³
Compressive strength at 10% deformation	9,6	kPa
Standard color	Red	
CFC (freon) free. In compliance with L .549 of 28/12/93
