

**OBJECT: CONFORMITY DECLARATION – PRIME RANGE**

We declare that all products included in range Prime, realized by Cristina S.r.l. a socio unico are manufactured using high quality components and raw materials coming from qualify suppliers which guarantee a careful control during all the production stage, furthermore, the whole internal production process is subjected to a constant check and tests in order to guarantee an high quality standard level; particulory, all products, before being positioned to warehouse, are tested in order to avoid any further leaking problems.

Specifically Cristina make tests on every single piece with high pression test to verify hydraulic seal of body, valve and cardridges.

For what concern raw materials ( e.i. copper brass or stainless steel) used for hot stamping process, hot casting and mechanical working are consistent to European standards and re-entering in the brass alloy list with suitable requirement to use it for applications to contact with the drinkable water (Hygienic Copper Alloy Composition List – HCACL):

After finishing process ( e.i. chrome plating) all components are checked one by one by qualified workers and daily are subordinated to laboratory control as salt spray and thickness test ( Fisher X-Ray method).

At last, we confirm that all products are projected and manufactured following normative in force as:

- EN200 traditional taps
- EN817 mixers
- EN1111 thermostatics
- EN274 wastes
- EN15091 - 2006/95/CEE e 204/108/CE electronic taps
