

Product Features

- Made from high grade, solid Brass.
 - Eco-efficient automatic sesnor soap dispenser hand cleaning in it’s most simple and elegant format.
 - Great for washroom areas with little wall space, the Soap Tap is simple but elegant and attaches straight to the basin.
 - Multi-colors for option: chrome, matte black, gun gray and brushed gold.
 - Low noise with smart outlet design - The flow direction and speed has been carefully configured to ensure that there is no excess splashing or spray created and therefore works with a huge range of sinks.
 - Allowing over basin cleaning helps to minimise washroom clean up, and prevent slips as it eliminates water and soap spillage on floors.
- No mess and no water on the floor.
 - Making use of no touch technology offers a more hygienic hand cleaning solution.
 - 1000ml large capacity of soap bottle, foam type hand sanitizer, easy to re-fill the soap liquid.
 - Easy to install, clean and simple to operate.
 - The Soap Tap is a space saving alternative to traditional soap dispenser designs, using space over the basin that is otherwise overlooked. This saves valuable wall space, allowing you the opportunity to use this area for other items.

Technical Specification

Body Material	Hpb59-1 Solid Brass
Voltage	220-240V
Frequency	50/60Hz
Total Power	5W
Mounting Type	Deck Mounted
Hole diameter of basin	35mm
Electrical Isolation	Class II
Capacity of soap	1000ml
Soap type	Foam type hand sanitizer
Liquid volume each time	0.5ml
Ambient temperature	1-55°C
Size of tap (mm) W x H x D	191.5x140.5x50
Size of mater box (mm) W x H x D	110x215x120
Net Weight	2.2kgs
Sensing distance	5-12cm
Water Splash Proof	IP24
Auto Cutoff	60s
