

Description:

Sediment filter 5 micron

Application:

Filtration treatment for drinkable water. Retention of the solid particles and reduction of water turbidity.

Retention of the suspended particles of the water.

Technical features:

Containing material: Polypropylene

Filter material: Pressed polypropylene. Nominal filtration 5 micron

Dimensions

Exterior diameter:

2,5"

Length:

12,5"

Working conditions:

Maximum flow: 1 GPM / 3,78 LPM

Maximum pressure: 120 PSI / 8,4 BAR

Burst pressure: 600 PSI / 42 BAR

Maximum temperature: 113 °F / 45 °C

Connections

Inlet: 1/4" stem

Outlet: 1/4" stem

Treatment:

POLYPROPYLENE 5 microns

Performance 95% (depending on the water properties)

Maximum differential pressure: 0,5 bar (replace when the difference of pressure between inlet and outlet of the filter is greater).
