

Statement to Geberit WC seats

We do not issue an EU declaration of conformity (DoC) nor an EU declaration of performance (DoP) for WC seats, because there is not a European harmonized standard under the (CPR) construction products regulation (EU) No. 305/2011 for these products (WC seats). Furthermore, the product is not a construction product according to the CPR and it does not exist an EAD (European Assessment Document).

Therefore, the product is not marked with “CE” and it’s not allowed, and it’s also not allowed to issue an EU declaration of performance/conformity.

All our Geberit WC seats and lids are tested according to our GEBERIT technical specifications, for example:

- Quality requirements
- Material specification
- Dimensions and tolerances
- Load tests, Safety, requirements for hinges and buffers etc.

Furthermore, Geberit grants a consistent quality according to our Certificates Reg. no. H20644

ISO 9001:2015 Quality Management System and **ISO 14001:2015 Environmental Management System**.
