Subject: Declaration of conformity model Bolly HY

The model Bolly HY is manufactured by Cordivari in accordance with the EU directive 2014/68. For article 4.3. of the same directive, the tank must not be CE marked.

In compliance with Directive 2014/68 EU (PED) as well as regulations No. 812/2013 and No. 814/2013 issued by directive 2009/125 / EC (ErP - requirements for the eco-design of energy-related appliances) and the directive 2010/30 / EC (energy labeling of the same), the technical data and heat loss together with the energy classes are shown on the labels / technical sheets attached to the product. These labels / data sheets are to be considered an integral part of the instructions for use.

The product is built in S235 JR UNI EN 10025 carbon steel, and it is composed of two different tanks:

- In the upper part it is a calorifier suitable for operating with domestic hot water at a maximum pressure of 6 bar and a maximum temperature of 90°C. This tank is equipped with one fixed coil heat exchanger, suitable for operating with hot water at a pressure of 12 BAR and a maximum temperature of 110 ° C.
- In the lower part, it is a buffer tank suitable for withstanding a maximum operating pressure of 4 bar at a temperature between -10 and + 95° C.

All the containers, before the finishing treatment (Polywarm), are subjected to a hydraulic test equal to 1.3 times the maximum operating pressure.

For all other technical data it is recommended to consult the Cordivari S.r.l. catalog.

A stylized signature in black ink is written over the text "CORDIVARI S.r.l." which is printed in a bold, sans-serif font.
