

**FGA101***Handheld calibration keypad for FGE/FGT100 series gas detectors***Simple operation**

The FGA101 allows the field calibration of the FGE/FGT 100 series of gas detectors. The detector's zero, span and 4-20mA parameters are easily adjusted using the 4 digit display and 3 push buttons. The calibration unit has a cable to connect to the FGE/FGT 110 and 150 detectors, and an infra red transmitter and receiver to perform totally non-intrusive communication with the FGE170 irDA detectors. The instrument is supplied in an eco-leather bag.

**Standard Features**

- **Field adjustment of FGE100 and FGT100 series gas detectors**
- **Handheld unit**
- **Simple operation**
- **Cable connector for FGE/FGT 110/150 series gas detectors**
- **Infra red transmitter / receiver for the FGE170 irDA detectors**
- **Non intrusive adjustment for irDA detectors**

# FGA101

Handheld calibration keypad for FGE/FGT100 series gas detectors

## Specifications

<b>Dimensions</b>	60mm w, 100mm h, 21mm d
<b>LED indicators</b>	5
<b>Display digits</b>	4
<b>Command buttons</b>	3

## Ordering Information

Part No.	Description
FGA101	Handheld calibration keypad for FGE/FGT100 series gas detectors
