

HID Signo™ Express and Seos® Essentials

Secure Access That Grows With Your Business

A man in a light blue button-down shirt and blue jeans is standing in profile, facing right. He is holding a smartphone in his right hand, which is positioned near a black HID mobile ID reader mounted on a white wall. The reader has a green light at the top and the HID logo at the bottom. The background consists of a wooden door frame and a white wall. The text is centered in the middle of the image.

Introducing an affordable, standardized, and preconfigured access control solution designed for the mid-market.

At Last: Top-Tier Security and Versatile Access for Organizations of All Sizes

Escalating security threats and ever-increasing user demands for simplified, seamless experiences have driven huge advances in access control. Yet for too long, premium security solutions and reliable, modern mobile functionality were reserved for enterprises only, leaving smaller organizations vulnerable to risk, and often forced to choose lesser solutions from providers with less expertise.

Signo Express and Seos Essentials were created to ensure that businesses of all sizes could implement robust access control measures — easily and within budget — from a trusted, global leader.

Preselected and Preconfigured Essentials Make Modern, Secure Access Attainable

HID Signo Express and Seos Essentials are a standardized, pre-configured set of readers, credentials and mobile technology designed to meet the present-day needs of all organizations, and easily scale as those needs evolve.

This future-ready suite is **built for flexibility**, thanks to next-generation RFID and Bluetooth® readers and your choice of credentials — from preprogrammed plastic cards and fobs to industry-leading HID Mobile Access, which lets mobile devices easily unlock doors or access networks and services. The entire bundle is compatible with any physical access control system, allowing you to pair them with your preferred access controller.

Meet the Solution Portfolio. Your Key to Next Level Access Control

HID SIGNO EXPRESS READERS

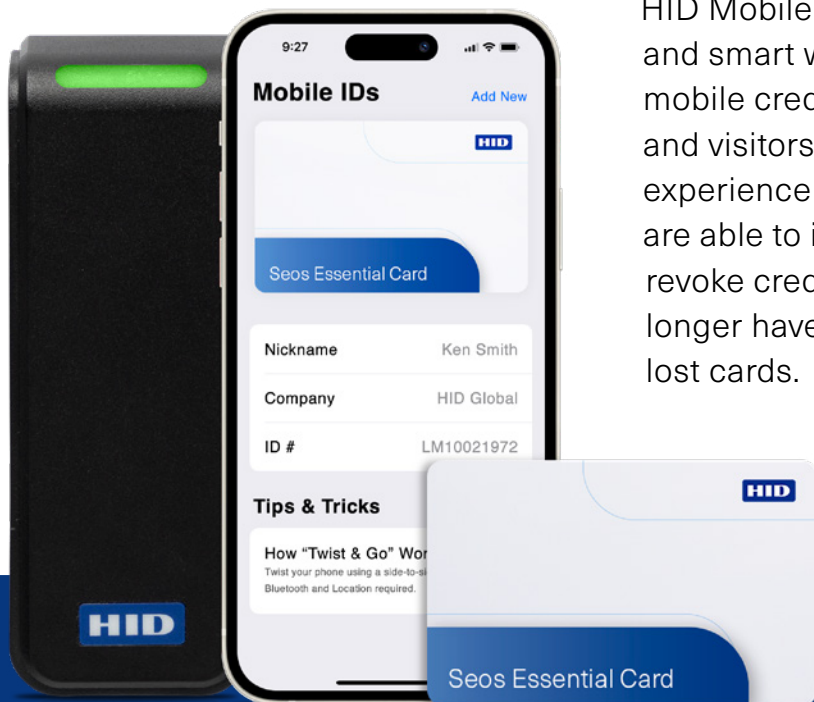

HID Signo Express readers include all the functionality your smaller business needs, without any extraneous features required by more complex environments. RFID- and Bluetooth-enabled, these independently certified readers are easy to install (using a simple terminal strip and Wiegand connection) and come ready to use with HID Seos and HID Mobile Access credentials.

SEOS ESSENTIALS CARDS AND FOBS

Leveraging high security Seos technology, Seos Essentials credentials are pre-configured to provide maximum simplicity and compatibility. Offered as cards, fobs or mobile to cover any application, each credential is also pre-programmed with a unique tracking number and compatible with all standard PACS systems.

HID MOBILE ACCESS

HID Mobile Access turns smartphones and smart watches into sustainable mobile credentials, giving employees and visitors the convenient user experience they want. Administrators are able to instantly issue, change or revoke credentials over the air, and no longer have to waste time replacing lost cards.

High-End Security Without High-End Pricing

Signo Express and Seos Essentials make it easy to protect your people, your property and your business, while delivering operational efficiencies and a seamless user experience.

A Secure All-in-One Solution

A straightforward selection of high-quality, highly compatible products makes ordering, installation and management easy. By keeping the experience simple and reliable, Signo Express and Seos Essentials ensure a seamless rollout and user-friendly operation through:

- A standardized ordering process (single part number) to save time and money
- Simplified installation and deployment
- Choice of preprogrammed PVC cards, fobs or mobile credentials
- The opportunity to pair with any PACS controller or credential

Future-Ready Technology

Enjoy modern access control capabilities without any unnecessary complexity to meet the demands of today — and tomorrow. Signo Express and Seos Essentials allow you to tailor your setup to fit your specific needs through:

- Superior security powered by HID Seos, leveraging multilayered security and airtight cryptography
- Next-generation RFID and Bluetooth® readers
- A modern user experience, including mobile access via digital credentials
- Cloud-based digital credential management

Cost-Effective, Without Compromise

We believe that premium security shouldn't be a luxury. Signo Express and Seos Essentials ensures that advanced security is accessible to all, delivering peace of mind for every organization, regardless of size, by offering:

- All of the essential features required for robust security
- Straightforward pricing designed for small and mid-sized budgets
- Advanced security to prevent costly breaches
- A cost-effective alternative to CSN-based credentials, which are easily cloned
- HID's proven reliability and global support

Ready for Simplified, Future-Forward Access? Here's What You'll Need to Order.

Choose from our suite of preconfigured products built for off-the-shelf compatibility — with each other and any other physical access control system.

SIGNO EXPRESS READER

Simplicity meets security for traditional physical access control.

For New Installations

Part Number: 20XTKK-X0-000000

Standard: Supports Seos & Mobile ID

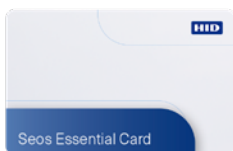

For Existing Installations — Migration from CSN Technology

Part Number: 20XTKK-X2-000000

Supports: Seos, Mobile ID & CSN

For use in existing sites to migrate to higher security.

Additional profiles are available; please refer to the [How to Order Guide](#)

SEOS ESSENTIAL CREDENTIAL (MOQ 100)

HID's Seos Essential card is a simple, single-application card designed to be an economical solution for everyday implementations of secure physical access control.

Part Number: 550PGGAN-HID32

SEOS KEY FOB (MOQ 100)

HID's Seos Key Fob is a credential that delivers the same level of security as a smart card in a convenient, portable key fob form factor.

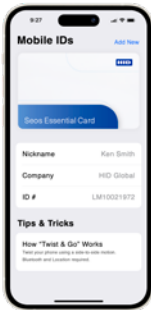

Part Number: 5266PNNA-HID32

SEOS CLAMSHELL CREDENTIAL (MOQ 100)

HID's Seos Clamshell is a durable credential that delivers the same level of security as a smart card, featuring a slot punch to enable convenient deployment.

Part Number: 5656PMSAV-HID32

SEOS ESSENTIAL MOBILE LICENSES (MOQ 20)

1. Sign up for [HID Mobile Access Portal](#)
2. Order a 1 year or 3 year license using the following part numbers:
MID-SUB-T050 – 1 year License
MID-SUB-T053 – 3 Year License
3. Please supply the following additional information when ordering:
Format = H10317
ORG ID = defined when portal is set up and then emailed to you.

It's time to upgrade your access control experience and migrate away from unsecure, legacy technology.
