New preprogrammed TRANSIT Ultimate Products

We are pleased to introduce our new preprogrammed TRANSIT Ultimate readers and Compact Button options. These are perfect for distribution, with preloaded programming, making it easier to stock and ship without the need for custom configurations.

Preprogrammed Readers & Compact Button

You no longer need to deal with the complexities of custom programming or filling out the How-to-Order Guide. The following preprogrammed items are now available for quick, easy stocking:

9229203 – TRANSIT Ultimate Preprogrammed

9567879 – Compact Button Preprogrammed

Features: *Preprogrammed with RS232, HID, Wiegand interfaces, default programming (end-user code: GF227), and P81 firmware that fits most applications.*

Add pre-programmed items to existing installations: *using the TRANSIT Configuration tool to read the current programming.*

Benefits for You

Streamlined Stocking: These products can be stocked on your shelves and are ready to ship immediately without waiting for custom configurations.

No More HTOG: The How-to-Order Guide (HTOG) is no longer required for these preprogrammed items, saving you time and simplifying the ordering process.

Faster Lead Times: With preprogrammed readers available for next-day shipment, you can respond quickly to customer demands and meet their needs efficiently.

Benefits for Your Customers

When you choose TRANSIT Ultimate for long-range vehicle identification, your customers will experience:

Seamless Access Control: Effortless, automatic vehicle identification ensures a smooth flow at entry and exit points, improving overall user experience.

High-Level Security: Robust encryption and customization options offer enhanced security for vehicle access, safeguarding restricted areas.

Scalability and Flexibility: Whether it's small installations or large operations, TRANSIT Ultimate adapts to various project sizes and customer needs.

What Do You Need to Do?

Add the new preprogrammed readers and Compact Button to your inventory today!
Start enjoying faster lead times and simplified operations with these off-the-shelf products.
