# HID Signo Biometric Reader 25B Designed for real-world performance

The HID<sup>®</sup> Signo<sup>™</sup> Biometric Reader is designed for "real-world" applications, where people have wet, dry, dirty or worn fingerprints. This is where the reader comes into a class of its own — capturing and reading fingerprints that other devices cannot.

With HID Global's patented multispectral imaging technology, the device captures fingerprint images from both the surface and the sub-surface, thereby delivering consistent read performance regardless of environmental and skin conditions. Industry-leading liveness detection capabilities also prevent spoof attempts leveraging fake fingers or latent fingerprints.

Safeguard against costly vulnerabilities with end-to-end security for each user's biometric data. Biometric images are converted into a "template" (a string of data), meaning no image of the fingerprint is ever saved. Templates stored on the device or server are then also encrypted with AES-256.

The HID Signo Biometric Reader supports a variety of popular contactless credential technologies including Seos®, iCLASS SE®, iCLASS®, MIFARE DESFire, MIFARE Classic credentials.

This device is paired with the web-based HID Biometric Manager software that performs configuration and management of the reader. In addition, the software enables enrollment of user's fingerprint credentials for use with the different biometric authentication modes 1:1 verification and 1:N identification.\*

### DOOR CONTROLLER CAPABILITIES

Built-in door access controller functionality limited to API partner control. This enables the deployment of an intelligent and powerful edge-based biometric solution that supports local access authorization and door control functions. The device is also capable of supporting a downstream reader for secure egress via OSDP connection.

The HID Signo Biometric Reader can reliably read fingerprints of all types, including those that are hard-to-read due to the following conditions:

#### **KEY BENEFITS**

- Highly versatile Unmatched flexibility to deploy multiple authentication modes, including biometric fingerprint and contactless physical with a single reader platform.
- Enhanced Performance -- Advanced biometric fingerprint match reliability with patented multispectral imaging sensor that reads the subdermal layer of the skin for better accuracy.
- **Connected to the future –** Easily configure and manage in the field with HID Biometric Manager.

# HID Signo Biometric Reader 25B

### **HIGHLY VERSATILE**

- Supports 1:N biometric authentication and template on card
- On-Prem RESTful API along with a developer environment

### ENHANCED PERFORMANCE

- · Patented multispectral imaging technology
- Native OSDP secure channel capability
- Robust outdoor performance with an IP67 rating and IK9 impact rating

## HID BIOMETRIC MANAGER

- Select your authentication mode + enable and disable credential compatibility
- Securely enroll users and encode templates on card

Model Number	25B
13.56 MHz Credential Compatibility	Secure Identity Object <sup>™</sup> (SIO) on Seos®, iCLASS SE®/SR     iCLASS® Access Control Application (standard iCLASS cards)     ISO 14443A (MIFARE) CSN, ISO 14443B CSN     Template on Card with Seos DESFire EV3
	TYPICAL CONTACTLESS READ RANGE' - SINGLE TECHNOLOGY ID-1 CARDS
Seos™	1.0" (3 cm)
iCLASS®	2.0" (5 cm)
MIFARE® Classic , MIFAREPlus	3.0" (8 cm)
MIFARE DESFire® (EV1, EV2, EV3)	1.5" (4 cm)
	HARDWARE
Mounting	Mullion Size; mount on door mullion or any flat surface
Color	Black Body; Silver Mounting Bracket
Dimensions (width x length x depth)	1.97" x 8.03" x 2.17" (5.0 cm x 20.4 cm x 5.5 cm)
Product Weight	13.04oz (0.38kg)
Operating Voltage Range	12 VDC (9-14 VDC)
Current Draw - Normal Standby Current <sup>2</sup>	800mA
Current Draw - Maximum Average <sup>3</sup>	1.5A @12 VDC
Current Draw - Peak <sup>4</sup>	2A @ 12 VDC
Supervised Inputs Power (MAX)	0.025W (5mA sink, 5V nominal) 0 to +5 VDC
<b>Operating Temperature</b>	-4° F to 153° F (-20° C to 66° C)
Operating Humidity	0% to 95% relative humidity non-condensing
Storage Temperature	-40° F to 194° F (-40° C to 90° C)
Environmental Rating	IP67 Indoor/Outdoor and IK09 Impact Ratings
Fingerprint Biometric Sensor Type	Optical (Multispectral Imaging)
	DEVICE CAPACITY
Transaction Event Logs	1,000,000
Max number of cardholders	250,000
Max number of users	5,000 (1:N Searching Identification)
	BIOMETRIC FUNCTIONS
Template output format	1:1: ANSI 378 1:N: Proprietary (ANSI 378+ format)
Verify (1:1) match score input	ANSI 378 template
Identify (1:N) search score input	Proprietary template (ANSI 378+ format)
Latent and liveness detection	Yes (multispectral imaging)
Language Support⁵	English, French, German, Spanish (International), Russian, Portuguese (Brazilian), Italian, Chinese (Simplified), Japanese, Korean, Arabic
Communications	Ethernet (10/100), Wiegand, Open Supervised Device Protocol (OSDP) via RS485 (OSDP BIOREAD & BIOMATCH command and pivCLASS Embedded Authentication - NOT SUPPORTED)
Panel Connection	Pigtail
GPIO	1 TTL Input/Output (Selectable), 1 Supervised Input/ TTL Output (Selectable)
Relay Contact Rating (Dry Output)	1A @ 30VDC (MAX Amperage that is UL Certified)
Certifications	UL294/cUL (US), FCC (US), IC (Canada), CE (EU), RCM (Australia, New Zealand), BIS & WPC (India), Anat (Brazil) NOM & IFT (Mexico), NCC (Taiwan), iDA (Singapore), MIC (Japan), SRRC (China), RoHS III, and additional regions. <u>www.hidglobal.com/certifications</u>
Patents	www.hidglobal.com/patents
Housing Material	UL94 Polycarbonate
	Warranted against defects in materials and workmanship for 18 months

conditions, including metallic mounting surface can significantly degrade read range and performance; plastic or ferrite spacers are conditions, including metallic mounting surface can significantly degrade read range and performance; plastic or ferrite spacers an recommended to improve performance on metallic mounting surfaces.
Standby AVG - RMS current draw without a card in the RF field.
Maximum AVG - RMS current draw during continuous card reads. Not evaluated by UL.
Peak - highest instantaneous current draw during RF communication.
Refers to languages supported by "HID Biometric Manager", software utility tool for biometric enrollment and device configuration.
