

JA-155P Wireless ceiling PIR motion detector

The product is a wireless system device for the JABLOTRON 100+. It is designed to detect human body motion inside buildings. Compared to standard motion detectors from the JABLOTRON 100+ series, this detector is designed for ceiling installation.

o Declaration of conformity - JA-155P (PDF 702.64 kB)

Description

It is installed on the ceiling and its guaranteed detection coverage is 360° with a capture radius of up to 5.5 m at a mounting height of 3.5 m.

The resistance to false alarms is adjustable at two levels

The detector has a pulse response and occupies one position in the system.

The mounting spacer (PLV-P-ST) is a certified accessory for ceiling detectors; these can be used with wireless detectors to separate the antenna from the mounting surface and thus to potentially improve the range.

Technical specifications

Power 2x lithium batteries, type CR123A (3 V/1500 mAh) Warning: batteries are not included. Number of batteries 1x CR123A 2x CR123A Lifetime (Smartwatch mode) 2 years 4 years Low battery voltage < 2.4 V **Communication band** 868.1 MHz, JABLOTRON protocol **RF** range up to 300 m (open area) **Recommended installation height** 2.5 - 3.5 m above the ground level **Detection coverage** 360°/11 m (installation height - 3.5 m) Dimmensions Ø 125 x 40 mm Weight (without batteries) 124 g Classification security grade 2/II. Indoor general (according to EN 50131-1) **Operational environment** indoor general
