testing technology from No Climb

PIONEERING THE WORLD OF TESTING TECHNOLOGY

As the world's only ISO 9001 Approved Manufacturer of detector testing products we can offer you an unrivalled choice of solutions to meet your specific needs.

We work in partnership with all the leading detector manufacturers to ensure that our products are compatible and safe to use with the widest range of detectors across the world.

As well as the endorsement of detector manufacturers, core products are UL certified and all products support safe and efficient functional testing - compliant with industry codes and standards.

ALL THE EXPERIENCE TO HELP FIND YOUR RIGHT SOLUTION

100+ Staff

Staff working in the UK, Europe & the Middle East.

Global Leader

No.1 in the fire detection test equipment market.

20 Years of Solo

The industry's most popular range of detector test equipment.

130 Countries

Products distributed to 130+ countries and counting.

Partnerships

Approved by leading detector manufacturers and third parties.

GLOBAL COMPATIBILITY

Over 500 detectors in one room might seem a little excessive, however for the Test Labs onsite at our Hertfordshire base it is exactly what is needed!

These, along with the expertise and experience of our in-house technical team, mean we are able to test our products against detector makes and models from around the world – ensuring the detectors activate as intended and alerting us to any trends or unique results.

This amount of testing and level of expertise is vital to our success and we know it really matters to our customers.

Our products perform a vital life safety role, if you use them you need to be able to trust that they will work in a reliable and efficient manner and offer a solution for all the detectors you are likely to discover on-site.

With a worldwide customer base, compatibility testing is no easy feat, as a result the 500+ detectors in our lab include detectors of different profile, design and age. It takes a lot of science and testing to get things right – in the build-up to the launch of a new product, it's not uncommon for our technical team to run in excess of 10,000 tests – just to ensure the best possible results and the ultimate performance in terms of compatibility and efficiency.

INDUSTRY STANDARD

Functional testing of fire detectors should be carried out as described in BS5839-1.

Smoke Detector Testing

"Point smoke detectors should be functionally tested by a method that confirms that smoke can enter the detector chamber and produce a fire alarm signal (e.g. By use of apparatus that generates simulated smoke or suitable aerosols around the detector). It should be ensured that the material used does not cause damage to, or affect the subsequent performance of the detector…."

BS:5839-1: 2017 Clause 45.4 (d) – Smoke

What this means
- Approved by detector manufacturers
- Safe to use on the detector
- Considerate of the immediate environment
- Free from harmful contents

Multi-Sensor Detector Testing

"The guidance of the manufacturer on the manner in which the detector can be functionally tested effectively should be followed."

"..multisensor fire detectors should be physically tested by a method that confirms that products of combustion in the vicinity of the detector can reach the sensors and that the appropriate response is confirmed at the CIE."

BS:5839-1: 2017 Clause 45.4 (j)

What this means
- Approved by detector manufacturers
- Capable of delivering stimuli simultaneously
- Deliver a fast effective means of testing
- Safe for the detector and immediate environment

Testing Hard-to-Access Detectors

"For remotely situated or hard-to-access detection equipment, consideration needs to be given to the feasibility of testing and maintenance at the design stage."

BS:5839-1: 2017 Clause 22.1

What this means
- Detectors should be tested – regardless of position
- The test method should be approved by detector manufacturers

![testifire - MULTI-STIMULUS DETECTOR TESTER logo]

> ANY DETECTOR
> ANY TIME

Testifire is the world's leading all-in-one tester. One tool for testing smoke, heat and CO allows testing of any detector regardless of type.

As an all-in-one tester, Testifire not only delivers on convenience - it is also the leading solution for compliant testing of multi-sensor detectors, which are becoming more and more widespread.

Testifire offers a built-in clearing mode to eliminate repeat alarms and its high heat setting allows for testing of heat sensors up to 100°C.

YOUR TESTIFIRE SOLUTIONS

Do you mainly test smoke and heat, or do you test smoke, heat & CO?

Choosing the right Testifire solution for you couldn't be easier.

100°C Heat

TESTIFIRE SMOKE / HEAT TEST KIT

TESTIFIRE 1001-001

Includes:

1x Testifire 1000-001 Head Unit (Smoke & Heat)
1x TS3-001 Smoke Capsule
1x Solo 727-001 Fast Charger
2x Solo 770-001 Battery Baton

100°C Heat

TESTIFIRE SMOKE / HEAT / CO TEST KIT

TESTIFIRE 2001-001

Includes:

1x Testifire 2000-001 Head Unit (Smoke, Heat & CO)
1x TS3-001 Smoke Capsule
1x TC3-001 CO Capsule
1x Solo 727-001 Fast Charger
2x Solo 770-001 Battery Baton

Accessories

Testifire uses non-hazardous, non-pressurised, environmentally -friendly capsules to generate smoke and CO.

To make sure you do not run out of capsules, the following capsule replacement packs are available:

Smoke Capsules	
Replacement Smoke Capsule	**TS3-6PACK-001**
Replacement Smoke Capsule	**TS3-3PACK-001**

CO Capsules	
Replacement CO Capsule	**TC3-6PACK-001**
Replacement CO Capsule	**TC3-3PACK-001**

URBAN KITS

For engineers on the go

When the poles need to be compact and easy to carry – for example, when you are travelling on public transport or are carrying all your test equipment on foot, then the Solo Urban Kits are your ideal choice.

Not only are the poles compact enough to fit on a backpack, the backpack will also keep your Testifire protected too.

With this kit you will be able to access and test detectors at heights of up to 5 metres.

Collapsed length: 60cm

INDUSTRY LEADING TEST EQUIPMENT

For over 20 years, Solo has been the industry's most popular range of detector test equipment. Used and approved worldwide, the comprehensive Solo range allows you to choose the right solution for your needs.

Solo 365 is the latest addition to the Solo range. Similar to Testifire, Solo 365 uses non-hazardous, non-pressurised, environmentally-friendly cartridges to generate smoke. Smoke testing has never been this easy.

A proximity sensor allows automatic generation of smoke as the detector enters the cup. Repeat alarms are all but eliminated with the clearing mode – with remaining smoke cleared away from the detector after testing.

YOUR SOLO SOLUTIONS

SOLO 365 SMOKE TEST KIT

SOLO 365-001

Includes

1x Solo 365-001 Smoke Detector Tester
1x Solo ES3-001 Smoke Cartridge
1x Solo 371-001 Smoke Generator
1x Solo 370-001 Li-ion Battery Pack
1x USB Universal Charger

Smoke Cartridge   **ES3-12PACK-001**

SOLO 365 ASD ADAPTOR

SOLO 372-001

If you are testing ASD systems, the Solo372-001 is the accessory for you. It is an adapter for your Solo 365 that's easily fitted to allow functional testing of ASD systems.

DISPENSERS & AEROSOLS

The most widely used system for the last 20 years. The dispenser works with Solo A5, Solo A10s and Solo A10 smoke detector test aerosols.

Used with Solo C3, it also delivers fast and effective functional testing of CO detectors.

Available in two sizes:

SUITS DETECTORS UP TO 100 MM / 4" DIAMETER

SUITS DETECTORS UP TO 177 MM / 7" DIAMETER

smokesabre™
SMOKE DETECTOR TESTER

SMOKESABRE HAND-HELD AEROSOL

SMOKESABRE-01-001

The ultimate hand-held smoke detector tester.

The built in 'Sabre' makes the product unique compared to other hand-held smoke test sprays - preventing use too close to the detector, that could lead to damage and nuisance alarms.

SmokeSabre is the ideal back-up for your complete test and maintenance kit or perfect as a test solution for small jobs or infrequent testing.

scorpion®
REMOTE DETECTOR TEST TECHNOLOGY

TESTING HARD-TO-ACCESS SMOKE DETECTORS?

Scorpion is the solution for buildings with hard-to-access detectors. Suitable for both Point and Aspirating Smoke Detection (ASD) systems, Scorpion ensures all smoke detectors can be tested – regardless of location.

Detectors in hard-to-access locations still need to be tested, and this can take not only additional time, but incur additional costs and personnel downtime. Scorpion suits a wide range of applications.
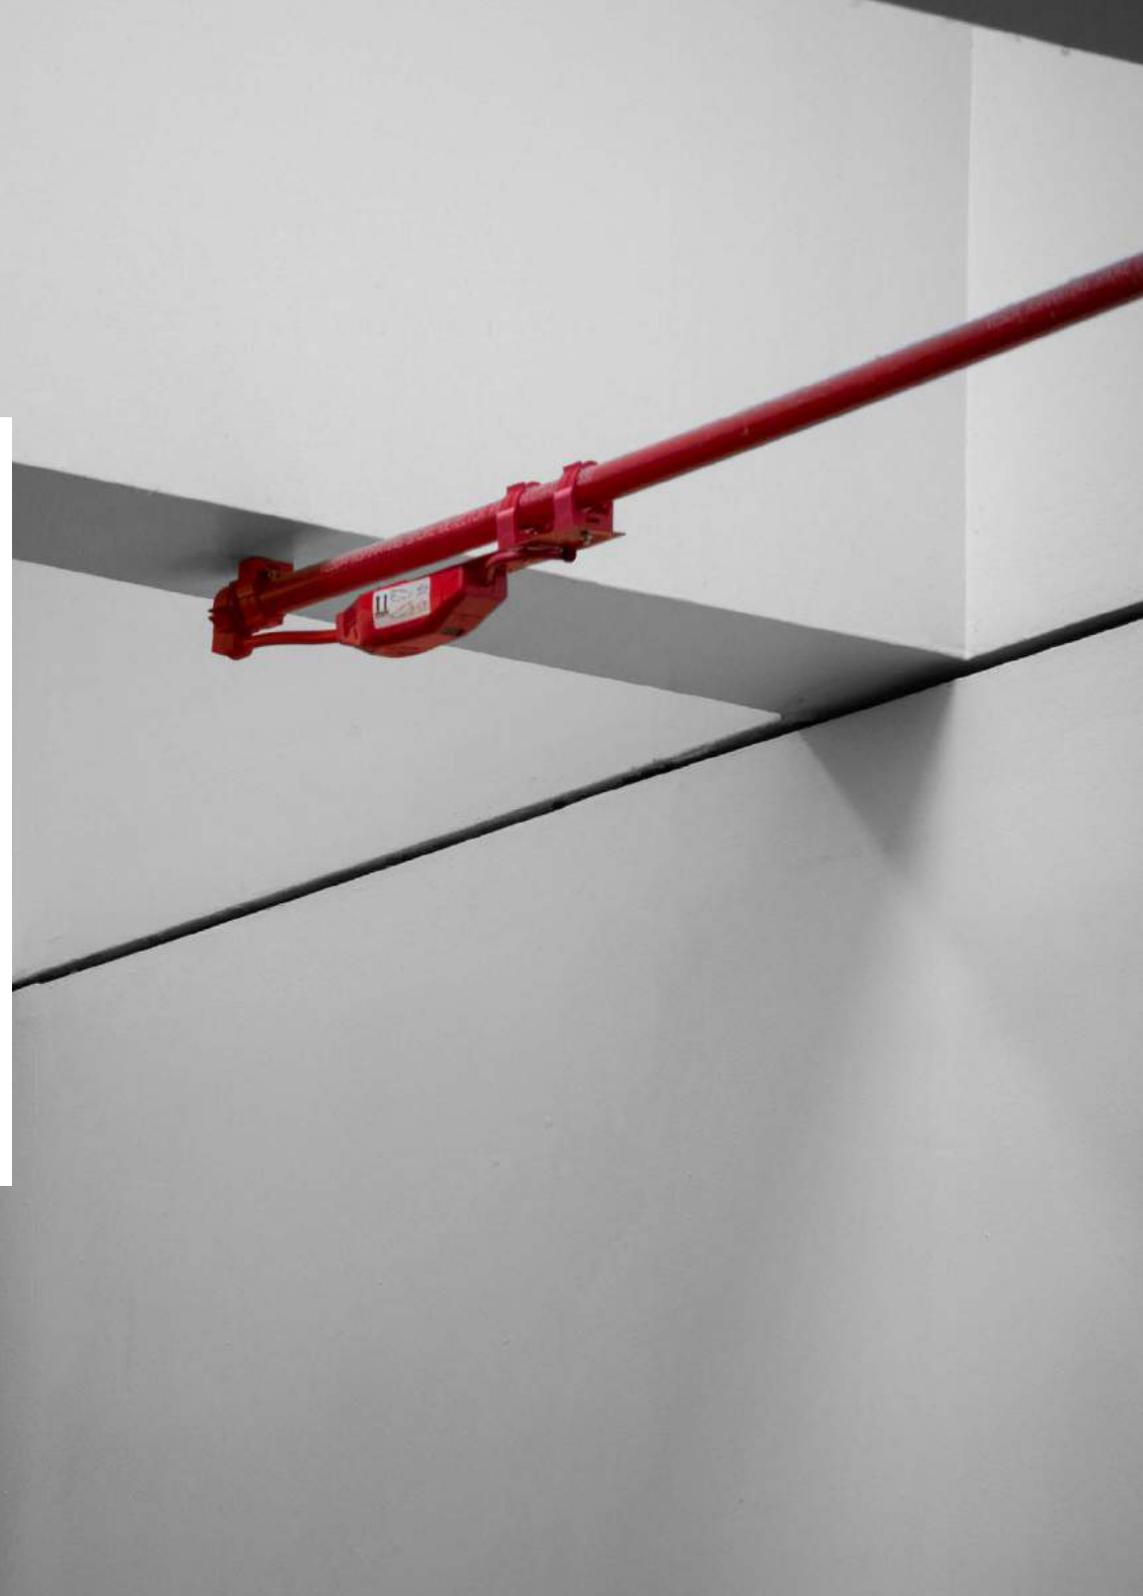

SOLUTIONS FOR TESTING POINT & ASD SYSTEMS

SCORPION POINT SMOKE DETECTOR TESTER

SCORP 1011-001

The Scorpion head unit is permanently installed alongside the smoke detector.

Includes
1 x Scorp 1001-001 Point Head Unit & Mounting Bracket
1 x Scorp 25-001 Access Point

SCORPION ASD SYSTEM TESTER

SCORP 2011-001

The Scorpion head unit is permanently mounted adjacent to a sampling point on an ASD system pipe – typically at the end of the run. Just one head unit is required for each pipe run – regardless of the number of sampling points.

Includes
1 x Scorp 2001-001 ASD Head Unit & Mounting Bracket
1 x Scorp 25-001 Access Point

ENGINEERS PORTABLE CONTROLLER

SCORP 7000-001

Portable controller connects to a Scorpion Access Point to enable smoke generation and testing.

Powered via a Solo 770 Battery Baton.*

*Available separately

![testifire® MULTI-STIMULUS DETECTOR TESTER]

On-site with Testifire & Choice Fire & Security

We joined David and the team from Choice Fire & Security on site at Dolphin Square in Pimlico, London to witness their use of Testifire as part of a large project installing Hochiki multi-sensor detectors.

The 13 month project, which has recently been completed, involved installing a multi-sensor detector in each of the site's 1064 luxury apartments.

This scale of task required careful planning and management, with Testifire playing a crucial role during commissioning – ensuring that the detectors were working as they should – ready to protect the residents and the luxury surroundings.

"SMOKE & HEAT ON THE SAME TOOL MAKES IT EASIER AND QUICKER FOR TESTING"

Dave King - Choice Fire & Security

scorpion®
REMOTE DETECTOR TEST TECHNOLOGY

University of Southampton - Lift Shaft & Void Install

We joined Detect Fire and Security engineers to have a look at a few of their buildings. The first was the Estates Department which housed a lift shaft with a point detector installed.

Testing of this detector not only required the presence of a fire engineer but also a lift engineer and facilities staff from the university. As well as adding additional cost to the testing – this also took a significant amount of time and effort to arrange.

On the day of the testing, the lift had to be put out of action, causing disruption to the running of department. In addition to normal safety practice, a member of staff was required to label each lift button over the five floors of the building to promote the lift being out of use.

The second building, a Chemistry Department, housed a number of lecture theatres and high hallways. These contained a concealed ASD system which spanned across a secure area. The pipes path, linking the ASD panel to the fire panel, had a security door in-between – meaning it required significant time and effort to access the area and carry out testing.

As the contracted fire and safety maintainer, Detect Fire and Security, typically tested the university's detectors using Testifire. However, those in hard-to-access locations, such as those identified above required a different approach and it was here that they considered Scorpion.

The justification for installing Scorpion saw the installers and building manager analyse the cost of installation against the cost of accessing the detector by other means. They considered cost areas such as access equipment and additional personnel and also looked at the amount of time it would take to organise. In many cases it was very easy to justify installing Scorpion. In the case of the lift shaft, the lifecycle of Scorpion means that once installed in will be capable of 240 tests of 15 seconds. Which should be long enough to outlast the life of the detector itself.

With everyone on site, the installation of Scorpion in the lift shaft and the ceiling void was quick and simple.

Future tests of these detectors can now be easily achieved from ground level – crucially at the same time as all the other detectors and without the need for additional personnel and planning time.
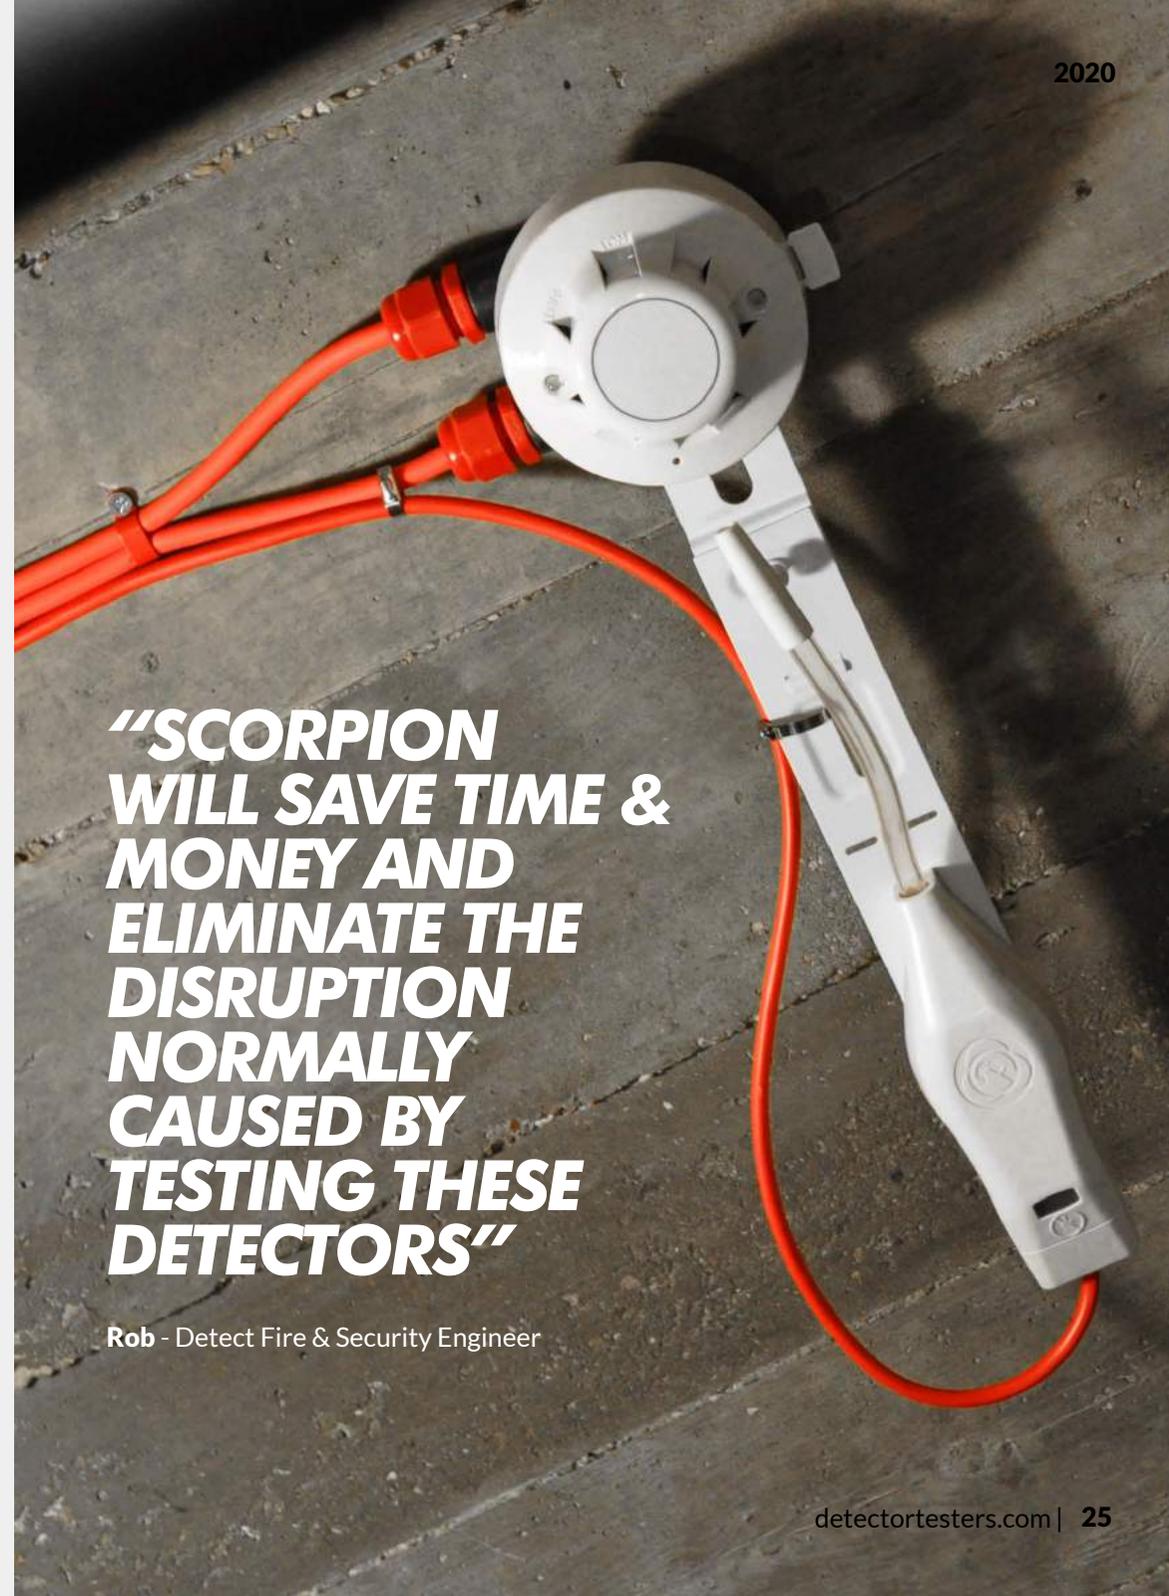

"SCORPION WILL SAVE TIME & MONEY AND ELIMINATE THE DISRUPTION NORMALLY CAUSED BY TESTING THESE DETECTORS"

Rob - Detect Fire & Security Engineer
